Hyderabad, Telangana

SUMMARY

Final-year B.Tech student in Information Technology (CGPA: 8.36) with hands-on experience building software applications using Python, FastAPI, Flask, REST APIs, SQL, and machine learning. Delivered end-to-end projects spanning backend development, database design, cloud deployment, and AI-driven solutions through academic and internship work. Strong foundation in object-oriented programming, data structures and algorithms, databases, and software engineering practices, with a track record of shipping working products from scratch.

EDUCATION

ACE Engineering College <i>B.Tech in Information Technology — CGPA: 8.36</i>	Hyderabad, Telangana 2023–2027
Raghava Laxmi Devi Govt. Junior College <i>Intermediate (MPC) — 95%</i>	Hyderabad, Telangana 2021–2023

EXPERIENCE

AI & Data Analytics Intern <i>Edunet Foundation (AICTE & Shell India)</i>	Oct 2025 – Nov 2025 Remote
– Developed machine learning applications using Python, pandas, NumPy and scikit-learn following structured software development practices. – Performed data preprocessing, feature engineering, model development, testing and evaluation on real-world datasets. – Collaborated with mentors and team members to deliver project milestones while documenting implementation details and presenting outcomes. – Strengthened software development, debugging, analytical thinking and problem-solving skills through hands-on project work.	

PROJECTS

Subscription Churn Prediction System <i>FastAPI, React, SQLite, Scikit-Learn</i> GitHub	2026
– Served as both Product Owner and Developer in a five-member Agile team to build a full-stack subscription churn prediction platform. – Developed FastAPI REST APIs for authentication, customer management, analytics, prediction, reporting and machine learning inference. – Integrated React frontend with backend services and implemented secure JWT-based authentication, PDF/CSV report generation and database operations using SQLAlchemy. – Optimized SQL query performance using indexed views and CTE-based queries, reducing critical query execution time from approximately 270 ms to under 40 ms. – Collaborated using Git and GitHub through sprint-based development while managing product backlog, user stories and sprint planning activities.	
Knowledge Vault AI <i>Python, Flask, REST API, LangChain, ChromaDB, SQLite</i> GitHub	2026
– Designed and developed an offline document intelligence application enabling semantic search and question answering without external APIs. – Built modular Flask REST APIs integrating SQLite, ChromaDB and LangChain for document indexing, retrieval and source-aware responses. – Implemented reusable backend modules, document processing pipeline, chat history management and vector search functionality.	

TECHNICAL SKILLS

Languages: Python, Java, SQL
Software Development: FastAPI, Flask, REST APIs, Object-Oriented Programming, Data Structures & Algorithms
Frontend: React.js, HTML, CSS, JavaScript, Material UI
Databases: SQLite, PostgreSQL, SQLAlchemy, ChromaDB
AI / ML: Scikit-Learn, TensorFlow, LangChain, Hugging Face, OpenCV, SHAP
Tools: Git, GitHub, Docker, VS Code, Render
Concepts: Software Engineering, DBMS, Backend Development, API Integration, Agile Scrum, Computer Vision, NLP

CERTIFICATIONS

Principles of Generative AI – Infosys Springboard (2026)

AI & Data Analytics – AICTE / Edunet Foundation / Shell India (2025)

Python Essentials 1 & 2 – Cisco (2024)

Introduction to SQL – Simplilearn (2024)

TCS iON Career Edge – Young Professional (2024)
